Date: _____

Faculty Mentor

Name: _____
Email: _____
Department: _____

Title of thesis project:

1. Attach to this form a 2-3 page double-spaced thesis proposal that briefly describes the **experimental question** and **rationale** for this experiment. Also, include a brief description of the **methods** you will use to explore this question and the **expected results** that you anticipate to gain. **It is important that you include the project's relevance to neurobiology research. If neurobiology is not the main focus of this proposal, please include a minimum of one paragraph relating the proposal to theory, methods, content, application or other relevance to the field of neurobiology.**

2. A Course Authorization Form for the Neurobiology Major must accompany this proposal form. The Neurobiology Major Program Committee must approve the senior thesis proposal before a student can register for Senior Honors/Senior Thesis – 681 or 691.

I have read this thesis proposal, and I approve of its content.

Thesis proposal received/approved by Neurobiology Major.
